## EXPERIENCE

---

### **Municipality of General Mariano Alvarez Cavite**

*IT Intern and Programmer, March 2024 to June 2024*

- Created a custom QR code generator web app to streamline the generation of QR Code IDs using PHP and Javascript.
- Debugged existing systems and contributed to the development of municipality projects.
- Assisted staff in troubleshooting software and hardware issues during events and training sessions.
- Scanned, organized, and encoded municipal documents to improve data management.
- Performed regular maintenance on laptops and software to ensure smooth operations.

## PROJECTS/RESEARCH COMPLETED

---

### **Research: Inventory and Sales Management System for Samson Pharmacy**

A capstone project for Samson Pharmacy, the Inventory and Sales Management System is a comprehensive solution designed for efficient tracking of inventory levels, monitoring product status, processing transactions, and generating reports.

### **Project: Custom QR Code Generator Web App for ISFs**

A web application developed during my internship at Municipality of GMA Cavite for the generation of QR Code IDs for ISF individuals. The application is versatile and can also be used to create QR Code IDs for other purposes, making it a flexible tool for various identification needs.

### **Project: Furniture Ordering System for Postrado**

A freelance web-app project that allows customers to browse and order furniture online, as well as submit requests for custom-made furniture. The system includes an admin panel where the shop owner can manage orders, customer records, and generate detailed sales and inventory reports for efficient business management.

## EDUCATION

---

**Cavite State University – Carmona Campus** - Aug 2019 to Sep 2024

*Bachelor of Science in Information Technology*

**Angelo Levardo Loyola Senior High School** - Aug 2017 to Mar 2019

*Information and Communications Technology*

## SKILLS

---

- |                                     |   |
|-------------------------------------|---|
| • Web Development                   | • Troubleshooting and debugging.                |
| • PHP Programming.                  | • Adaptable and eager to learn.                 |
| • Javascript and jQuery.            | • Can work under pressure.                      |
| • MySQL database.                   | • Strong analytical and problem-solving skills. |
| • Java Programming.                 | • Attention to detail.                          |
| • Knowledge in Git version control. |   |
